A first impression

In a sublime location with a beautiful view of the sparkling blue of Lake Garda, is built on an ancient olive grove, this new construction villa in the "Climate House A Standard" in Toscolano-Maderno. The olive grove symbolizes whole life and you can immediately feel the energy of this beautiful place as soon as you enter the property and are caught by the scent of Mediterranean plants. The modern design and stylish details distinguish the projected detached villa. The layout of the living spaces is distributed over three floors. The entire property is fenced and landscaped with a hedge towards the service road. Thus, the property will be almost secluded and offer a lot of privacy. Through the complete glass front that encompasses the living area, one will have an unobstructed view to the pool area over the private garden to the lake. A beautifully landscaped outdoor area with garden is the icing on the cake for any dream home. Thus, the outdoor areas are designed with Mediterranean plants such as cypresses, olive trees, oleander, laurel bushes, lavender and rosemary, typical of Lake Garda. The furnishing will be done by an interior designer and can be ordered and installed optionally, as shown in the renderings. The location is quiet and yet you can walk in a leisurely 10 minutes to the village to eat an ice cream or enjoy an aperitivo at the harbor.

Details of amenities

Access to the property is through an electric gate. One drives via the driveway directly into the garage under the building. The garage offers space for 2 cars and additional storage space for shelves and cabinets. Here in the basement are the technical or utility room of the villa, the technical room for the swimming pool, a cellar with additional wine cellar, a sauna, and a one-bedroom granny apartment with shower room and toilet. Since the villa is built on a slight slope, the granny apartment has a ground-level exit to the garden and a spacious outdoor terrace with about 25 square meters.

On the floor above is the large living and dining room with about 71 square meters. On two sides this living room is framed by glass elements facing the swimming pool and garden. This gives a beautiful unobstructed view to the outside. The glass fronts can be largely opened and thus the living space is extended to the spacious outdoor terrace. This measures approximately 120 square meters and adjoins the pool. Two bedrooms and two bathrooms as well as a storage room are also located on this floor. The areas could be made accessible through two entrances. Then two independent units would be created.

On the upper floor there is another bedroom with bathroom "en suite" and large roof terrace with all-glass balustrade. From here there is a fantastic lake view over the roofs of the city to the "Lungo Lago" and the harbor. The approximately 172 square meters of rooftop terrace offer the possibility to spend the night under the stars, to equip the area with additional sun loungers or to place an outdoor kitchen.
